GILDI COLLECTION

In our commitment to always provide the best alternatives to our customers, to meet their needs, **we welcome the latest innovation in super elastic eyewear hinges.**

Forget about welds and screws that with the passage of time and natural wear can present problems or lose their firmness, which can affect the life of your glasses.

The patented eyewear hinges design that you will find in our new Feather collection adopts a highly flexible and resistant structure that uses highly elastic and lightweight materials, with a cylindrical pivot system integrated to the arm, improving the opening range of the frame, which allows a better adaptation to different types of faces. Finally, the slim arm design helps to improve peripheral sensation and **provides a considerable reduction in the weight of our frames.**

TN 85
plus

It is a thermoplastic used for the manufacture of eyeglass frames. It is extremely light because 85% of its composition is nylon.

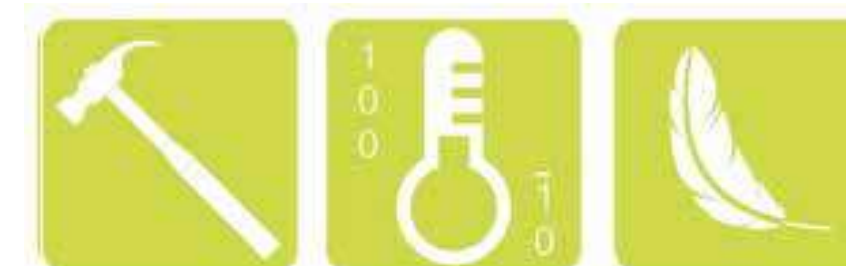

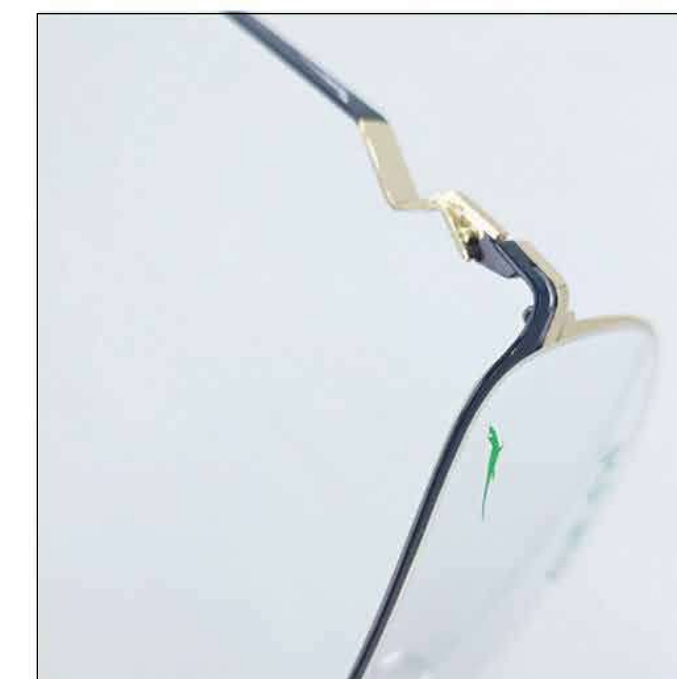

- Hypoallergenic
- Lightweight
- **Thinner frames**
- Durable
- Resistant
- **Flexible**

stainless **STEEL**

- Hypoallergenic
- Lightweight
- Durable
- CR + Steel
- **Anticorrosive and resistant**
- Adjustable
- Used in hinges and temples
- **Excellent alternative vs Titanium**
