GILDI COLLECTION

TITANIUM COLLECTION BY GILDI EYEWEAR

PureTi

Natural strength in every look

Inspired by the majesty of the earth, at [Gildi Eyewear](#) we bring to life the Minerals collection, a line of titanium eyewear that pays tribute to the strength, texture, and beauty of natural minerals. Each of the seven new styles—Basalt, Granite, Tefra, Picrita, Ankaramita, Andesite, and Trachyte—evokes the essence of rock formations that have stood the test of time.

Minerals frames fuse the refinement of acetate with the strength of tempered steel, resulting in elegant, lightweight, and surprisingly durable pieces. Designed for those who seek style with purpose, this collection is a celebration of nature, reinterpreted to accompany you in your daily life with character, comfort, and distinction.
