flex collection by GILDI

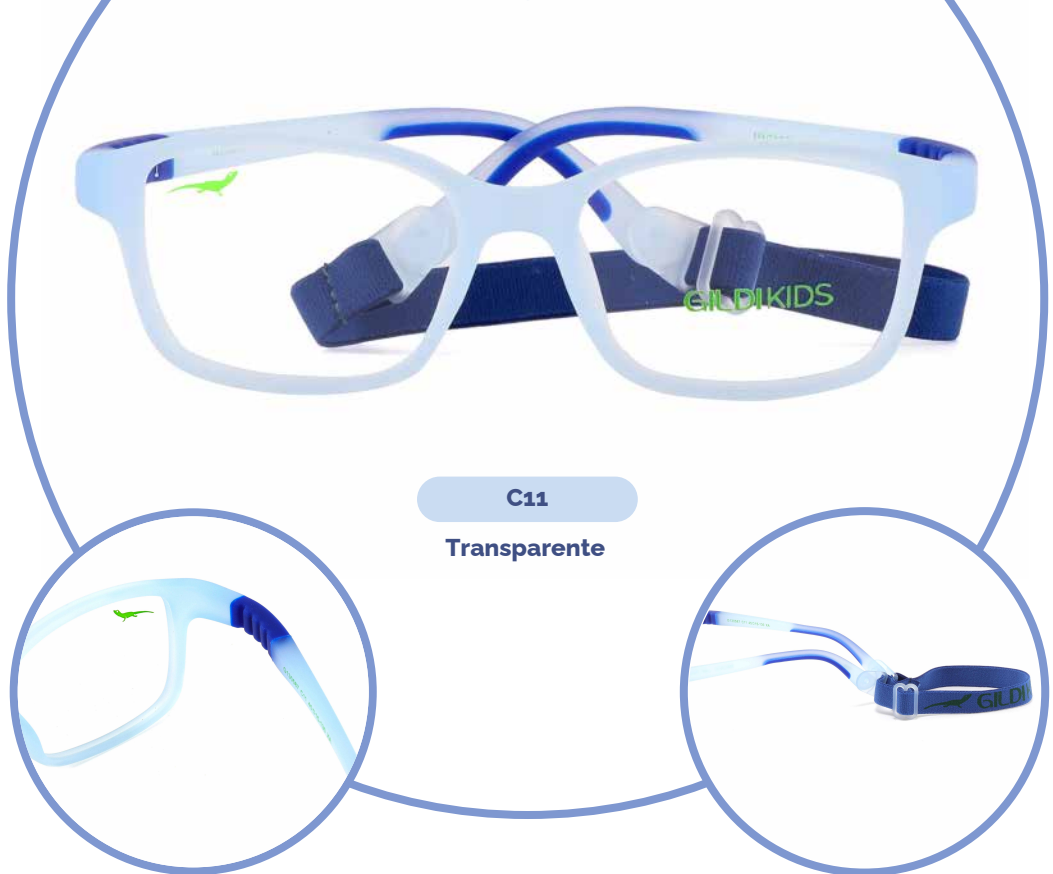

We're excited to welcome Tapir, Peccary, Macaque, and Lemur to the **animals** family. They'll be our guides as we explore our new **Flex collection**.

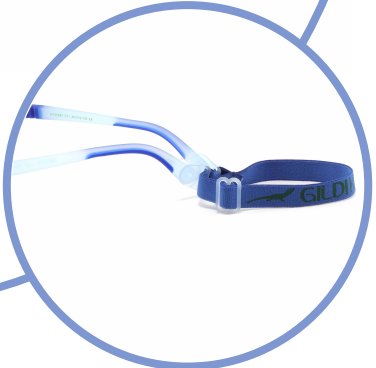

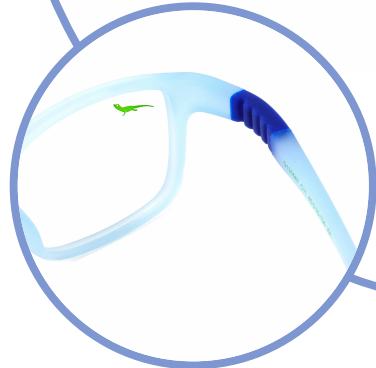

Exploring, playing, and having fun with GILDIKIDS will be the most **comfortable and safest experience your children can enjoy, thanks to Pebax®** a revolutionary material that is **antibacterial, hypoallergenic, lightweight, soft, and durable**. It also has natural elastic properties similar to rubber, **without the need for plasticizers**.

**Código: G130590**

Material: Pebax

**Did you know?** Lemurs are primates endemic to the island of Madagascar. Their name comes from "lemures," the ghosts or spirits of Roman mythology, inspired by the unique sounds they make.

# fuertes MAS flexibles

We're proud to introduce our new **animals** line, which brings together our Kids and Junior collections starting in 2023. The incredible Amazon rainforest and its wildlife will help you identify each of our styles, so you'll always recognize and request your favorite collection.

Always thinking of giving you the best, we've created a line specially designed for the little ones—featuring flexible, durable frames that won't lose their color or turn yellow over time. They're also safe and comfortable, perfect for playtime or sports, thanks to their strong elastic straps.

## Why did we choose Biosil?

Biosil is a high-resistance, low-density, platinum-based silicone that is thermomoldable. It contains no Bisphenol A, a chemical found in some plastics that can be harmful to health. It also prevents the growth of microorganisms such as germs, ensuring excellent hygiene and safety, and it's resistant to drastic temperature changes.
